

This one day course covers the aspects of Autoclave engineering required by technicians and personnel involved with the manufacture, installation and use of Autoclave high pressure pipe work.

### **COURSE DETAILS**

- Overview of Autoclave low pressure products
- Overview of Autoclave medium pressure products
- Overview of Autoclave high pressure products
- Correct Assembly Procedures
- Anti-Vibration Fittings
- Torque Settings
- Lubricants
- Autoclave tubing
- Autoclave for hydrogen sulphide H<sub>2</sub>S
- Practical demonstration on the hand coning & threading of Autoclave tubing
- Practical demonstration on electrically operated coning and threading machine

### **CERTIFICATION**

Hydrasun/Autoclave Product Training Certificate

### **COST**

Price on Application (Maximum 4 attendees per course)

### **COURSE REQUIREMENTS**

Full PPE required
