

# SPECIALIST PRODUCTS: HYDRAULIC & FILTRATION PRODUCTS

Hydrasun has established its hydraulic and filtration products and service capability centred around our position as Parker's premier distributor in Scotland.

Though our highly experienced team with extensive knowledge of these products and their specific applications, we can offer unrivalled supply solutions delivering the best combination of quality, service, price and overall value for money.

Please send any enquiries you may have to [info@hydrasun.com](mailto:info@hydrasun.com)

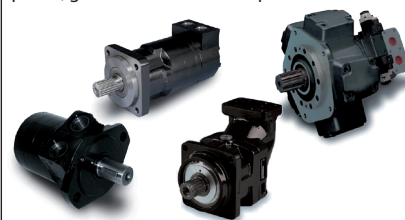

## Condition Monitoring Equipment

On Line, In Line and Off Line analysis equipment and sensors.

## Hydraulic Motors

High torque and high speed radial and axial piston, gear and vane motors up to 560 kW

## Hydraulic Accumulators

Piston, bladder, diaphragm, composite and stainless steel for subsea and topside applications

## Hydraulic Pumps

Piston, gear and vane pumps, open and closed loop, fixed and variable displacement up to 638cc/rev and 430 bar

## Hydraulic Filtration

Low, medium and high pressure filters, reservoir equipment and portable systems

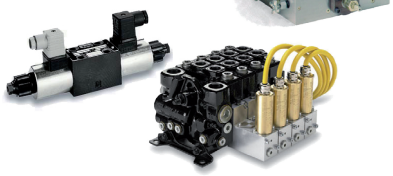

## Hydraulic Cylinders and Rotary Actuators

Tie-rod and round line cylinders up to 500mm bore and 600 bar WP. Rotary actuators up to 68,000 Nm

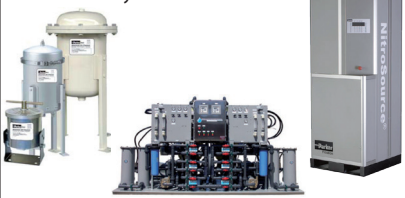

## Hydraulic Valves

Directional pressure and flow control valves, manual solenoid, proportional and ATEX versions

## Process Filtration and Separation Products

Air, gas, liquid fillers and separators, including nitrogen generators and reverse osmosis desalination systems

## Engine Filtration

Parker Racor for fuel, oil lubrication and air engine filtration applications

## Pneumatics and Automation

Air preparation and FRL, dryers, air fuses, cylinders and valves
