

HYDROGEN SKILLS ACADEMY

Hydrasun Pressure Systems Safety Awareness

The Hydrasun Pressure Systems Safety Awareness full day training programme has been developed to give attendees an awareness and understanding of best practice associated with working safely on pressure systems and in particular, working safely while carrying pressure testing activities.

On successful completion, the delegate will be awarded a Hydrasun certificate of course completion.

COURSE DURATION

- 1 day

PRE-REQUISITE

- None

CERTIFICATION

- Hydrasun certificate

TRAINER

- Our trainers and assessors have been certified by external accreditation bodies

COST

- Price on application – maximum 6 delegates per course

COURSE DETAILS

Introduction to Pressure Systems

- Definition of a pressure system
- Pressure systems legislation
- Principles of stored energy

Hazards associated with Pressure Systems

- What are the main hazards
- History of failures
- Managing the risks associated with pressure systems
- Containment

Danger of Pressure Injection Injuries

- Immediate actions
- Consequences
- Reporting / recording

Introduction to Pressure Testing

- Pressure test preparation & set up
- Pressure testing best practice, guidance
- Making safe and reinstatement of test area
- SSOW
- Supervision
- Maintenance of Test Adaptors
