SBT02 – Assemble & Install SBT with Cone & Threaded Medium & High Pressure Module

The Engineering Construction Industry Training Board (ECITB), in collaboration with Step Change in Safety, introduced the SBT model in 2012. The four approved training courses are derived from the ECITB SBT Training Standards with work based task assignments and ECITB Technical Competence Validation Tests. These training standards and competence tests cover isolations, dismantling techniques, inspection of components, shape components, replace components, install and pressure testing of small bore tubing assemblies. The SBT02 course is aimed at personnel who will be working with Cone & Threaded connections and have previously completed either the SBT01 Training course or the TSBT01 Technical Test.

The course is constructed on a modular format with delegate activities during each module. On completion of the training, the delegate will complete a knowledge test and a practical assessment activity utilising the learning outcomes from each individual module. On successful completion, the delegate will be awarded an ECITB certification of training – Valid for 12 Months.

COURSE DURATION

- 1 day

PRE-REQUISITE

- Must hold an ECITB Small Bore Tubing Twin Ferrule Approved Course certificate taken in the previous 6 months or have attained TSBT01 Assemble and Install Small Bore Tubing

CERTIFICATION

- ECITB certification of training – Valid for 12 Months (Note: Learners are not deemed technically competent at Stage 1)

TRAINER

- Our trainers are certified assessors, and have been accredited by ECITB

COST

- Price on application – maximum 5 delegates per course

NOTE

- This course is grant aided for ECITB registered employers

COURSE DETAILS

- Course Overview
- Tubing
- Tube Fitting
- Tools and Installation
- Safety at work with Cone & Thread Connections
- Assessment
- Moving towards Stage 3
